ITD Consulting Firms

RE: ITD CADD Standards and Workspace

ITD has upgraded its CADD System from MicroStation J (Version 7.X) and the InRoads SelectCAD (Version 8.02) suite of products to MicroStation XM (Version 8.9.X) and the InRoads XM (Version 8.9.X) suite of products. This upgrade includes a new and complete set of CADD Standards for ITD. These standards are managed by a MicroStation Workspace. The ITD Standard Workspace has been available for internal use at ITD since January 2007 and has been posted on the ITD Website for consultants to use since January 2008.

ITD's goal is to fully migrate from MicroStation J and the InRoads SelectCAD suite of products to MicroStation XM and the InRoads XM suite of products. Therefore, below is a list of milestones associated with this transition.

1.   January 2008 – All projects started after this date, need to be in the MicroStation XM and InRoads XM format utilizing the new ITD CADD Standards

2.   July 1, 2009 – Last date for all projects using MicroStation J and InRoads SelectCAD will be accepted for PSE Review. Projects that will not make this date need to be converted to MicroStation XM and InRoads XM utilizing the new ITD CADD Standard

Exceptions may be granted on a case by case basis.

Please contact Headquarters CADD Support if you have questions or need assistance with the ITD CADD Standards or Workspace.

Sincerely

Monica Crider, P.E.
Acting Consultant Administration Manager
